# SUBJECT INDEX

a.c. conductivity
  temperature dependence of, in polymer/organic metal systems, 89
Acetylene
  polymerization of, using various kinds of Ziegler–Natta catalysts, 239
Alkali metal
  -doped polyacetylene, electronic and structural properties of; some e.s.r. studies, 31
*p*-Aminophenol
  electrochemical behaviour of K ferricyanide, hydroquinone, catechol and, at polypyrrole film electrodes, 273
Arsenic
  4 K crystallographic and electronic structures of $(TMTFF)_2X$ salts ($X^-$: $PF_6^-$, $AsF_6^-$), 343

Bipolarons
  optical absorption from polarons and, in polythiophene, 179
$(BEDT–TTF)_4Hg_3Cl_8$
  e.s.r. and electrical properties of organic metal, 161
$(BEDT–TTF)_xTCNQ_y$ salt
  origin of anomaly in d.c. conductivity in, 157
$(BEDT–TTF)_2X$ salts
  syntheses, crystal structures and physical properties of conducting salts (X = $CF_3SO_3$ or *p*-$CH_3C_6H_4SO_3$), 117
BPDT–TTF salts
  optical study on, 301

Catalysts
  Ziegler–Natta, polymerization of acetylene using various kinds of, 239
Chain disorder
  X-ray study of triiodide, in some iodide organic salts, 127
Characterization
  of oriented polyacetylene films, synthesis and, 1
Chemical polymerization
  of polyaniline, effect of oxidation conditions on, 193
Chemical synthesis
  conducting polypyrrole by, in water, 217
  of doped polythiophene, one-step, by use of Cu(II) perchlorate as oxidant, 223
Chromatic reaction
  electrochemical behaviour of soluble polyaniline and its, in solutions, 255
Conducting properties
  induced in polyimide by ion beam irradiation, new, 81
Conductivity effects
  ion ranges in PPP and, 53
Copper
  one-step chemical synthesis of doped polythiophene by use of Cu(II) perchlorate as oxidant, 223
Crystal structure
  of conducting salts $(BEDT–TTF)_2X$ (X = $CF_3SO_3$ or *p*-$CH_3C_6H_4SO_3$), 117
Crystallographic structures
  of $(TMTFF)_2X$ salts ($X^-$: $PF_6^-$, $AsF_6^-$), 4 K, and electronic, 343

d.c. conductivity
  in $(BEDT–TTF)_xTCNQ_y$ salt, origin of anomaly in, 157
Dimethylsulphoxide solution
  Mg chloride–, electrochemical formation of GIC in, 267
Displacement vectors
  of localized vibrational modes around a charged soliton in *trans*-polyacetylene, 357

Electrical properties
  of organic metal $(BEDT–TTF)_4Hg_3Cl_8$, 161
  of organometallic TCNQ salts, 137
Electrochemical behaviour
  of K ferricyanide, hydroquinone, catechol and *p*-aminophenol

© Elsevier Sequoia/Printed in The Netherlands

at polypyrrole film electrodes, 273
of polyaniline films, influence of light on, 69
of soluble polyaniline and its chromatic reaction in solutions, 255
Electrochemical doping
*in situ* e.s.r. experiments on polyacetylene during, 311
Electrochemical formation
of GIC in Mg chloride–dimethylsulphoxide solution, 267
Electrochemical n-doping studies
segmented polyacetylene, $(CHD_y)_x$, 283
Electrochemical redox mechanisms
polyaniline films, 61
Electrochemical study
of poly(3-methylselenophene), 77
Electrode
polypyrrole film, electrochemical behaviour of K ferricyanide, hydroquinone, catechol and *p*-aminophenol at, 273
Electrointercalation
of IIIB metal chlorides $MCl_4$ into polyacetylene, 15
Electron–phonon coupling
new aspects of infrared study of, 151
Electronic properties
of alkali-metal-doped polyacetylene; some e.s.r. studies, 31
Electropolymerization
of thiophene, study of, 203
Electronic structure(s)
of polyiminovinylene as tractable model for polyaniline, 167
of $(TMTFF)_2X$ salts ($X^-$: $PF_6^-$, $AsF_6^-$), 4 K crystallographic and, 343
E.s.r.
and electrical properties of organic metal $(BEDT–TTF)_4Hg_3Cl_8$, 161
electronic and structural properties of alkali-metal-doped polyacetylene, 31
on polyacetylene during electrochemical doping, *in situ*, 311

Fluorine
$^{19}F$ n.m.r. study of graphite fluorosulfates, 379

Graphite
organic polymer–, composites, studies of semiconducting, from d.c. to microwave frequencies, 95
Graphite fluorosulfates
$^{19}F$ n.m.r. study of, 379
Graphite intercalation compound
electrochemical formation of, in Mg chloride–dimethylsulphoxide solution, 267
Ground state
of doped polyacetylene, 41

Hydroquinone
electrochemical behaviour of K ferricyanide, catechol and *p*-aminophenol at polypyrrole film electrodes, 273

Infrared spectra
of soluble polyaniline, 231
Infrared study
of electron–phonon coupling, new aspects of, 151
Iodide organic salts
triiodide chain disorder in some, X-ray study of, 127
Ion beam irradiation
new conducting and optical properties induced in polyimide by, 81
Ion ranges
in PPP and conductivity effects, 53

Light
influence of, on electrochemical behaviour of polyaniline films, 69

Magnesium chloride
–dimethylsulphoxide solution, electrochemical formation of GIC in, 267
Magnetic properties
of organometallic TCNQ salts, 137
Mercury
e.s.r. and electrical properties of organic metal $(BEDT–TTF)_4Hg_3Cl_8$, 161
Metal
polymer/organic metal systems, temperature dependence of a.c. conductivity in, 89
Metal chlorides
IIIB, electrointercalation of $MCl_4$ into polyacetylene, 15

Metallic properties
polymers with, importance of frontier orbital patterns in molecular design of, 371
Metallocene stacks
spectral properties of new series of organometallic TCNQ salts with, 145
Microwave frequencies
studies of semiconducting organic polymer–graphite composites from d.c. to, 95
Molecular design
of polymers with metallic properties, importance of frontier orbital patterns in, 371

N.m.r. study
$^{19}F$, of graphite fluorosulfates, 379

Optical absorption
from polarons and bipolarons in polythiophene, 179
Optical properties
induced in polyimide by ion beam irradiation, new conducting and, 81
Optical study
on bis(propylenedithio)tetrathiafulvalenium (BPDT–TTF) salts, 301
Orbital patterns
in molecular design of polymers with metallic properties, importance of frontier, 371
Oxidation conditions
effect of, on chemical polymerization of polyaniline, 193
Organic metal systems
polymer/, temperature dependence of a.c. conductivity in, 89

Phonon
electron– coupling, new aspects of infrared study of, 151
Phosphorus
4 K crystallographic and electronic structures of $(TMTTF)_2X$ salts ($X^-$: $PF_6^-$, $AsF_6^-$), 343
Physical properties
of conducting salts $(BEDT–TTF)_2X$ ($X = CF_3SO_3$ or $p$-$CH_3C_6H_4SO_3$), 117
Polarons
optical absorption from, and bipolarons in polythiophene, 179
Polyacetylene
displacement vectors of localized vibrational modes around a charged soliton in *trans*-, 257
electrointercalation of IIIB metal chlorides $MCl_4$ into, 15
*in situ* e.s.r. experiments on, during electrochemical doping, 311
ground state of doped, 41
Raman scattering of doped, 35
segmented, $(CHD_y)_x$; electrochemical n-doping studies, 283
synthesis and characterization of oriented, films, 1
synthesis and spectroscopic studies of $(CH)_x$ from PVC, 7
transport and spin resonance in n-doped, 23
Polyaniline
chemical polymerization of, effect of oxidation conditions on, 193
electrochemical behaviour of soluble, and its chromatic reaction in solutions, 255
electronic structure of polyiminovinylene as tractable model for, 167
infrared spectra of soluble, 231
Polyaniline films
electrochemical redox mechanisms, 61
influence of light on electrochemical behaviour of, 69
Polyazulene
surface plasmon study of electrochemically prepared polymers, 245
Polycarbonate films
properties of conductive, reticulate doped with $MPht(TCNQ)_2$ and $PrPht(TCNQ)_2$ salts; hightly-conductive form of PrPht–TCNQ by crystallization in polymer matrix, 107
Polyimide
new conducting and optical properties induced in, by ion beam irradiation, 81
Polyiminovinylene
electronic structure of, as tractable model for polyaniline, 167
Polymer(s)
electrochemically prepared, polyazulene, surface plasmon study of, 245

–graphite composites, studies of semiconducting organic, from d.c. to microwave frequencies, 95
molecular design of, with metallic properties, importance of frontier orbital patterns in, 371
/organic metal systems, temperature dependence of a.c. conductivity in, 89
Polymer composites
of soluble polythiophenes in polystyrene, conducting; comments on, 271
Polymer matrix
properties of conductive polycarbonate films reticulate doped with $MPht(TCNQ)_2$ and $PrPht(TCNQ)_2$ salts; highly-conductive form of PrPht–TCNQ by crystallization in, 107
Polymerization
of acetylene using various kinds of Ziegler–Natta catalysts, 239
of polyaniline, effect of oxidation conditions on chemical, 193
Poly(3-methylselenophene)
electrochemical study of, 77
Polyparaphenylene
ion ranges in, and conductivity effects, 53
vapour phase doping of, with K, 47
Polypyrrole
conducting, by chemical synthesis in water, 217
Raman spectra of, and its 2,5-$^{13}$C-substituted and C-deuterated analogues in doped and undoped states, 329
Polypyrrole film electrodes
electrochemical behaviour of K ferricyanide, hydroquinone, catechol and *p*-aminophenol at, 273
Polystyrene
conducting polymer composites of soluble polythiophenes in; comments on, 271
Polythiophene(s)
conducting polymer composites of soluble, in polystyrene; comments on, 271
one-step chemical synthesis of doped, by use of Cu(II) perchlorate as oxidant, 223
optical absorption from polarons and bipolarons in, 179
Polyvinyl chloride
synthesis and spectroscopic studies of $(CH)_x$ from PVC, 7
Potassium
vapour phase doping of polyparaphenylene with, 47
Potassium ferricyanide
electrochemical behaviour of, hydroquinone, catechol and *p*-aminophenol at polypyrrole film electrodes, 273
Praseodymium
properties of conductive polycarbonate films reticulate doped with $MPht(TCNQ)_2$ and $PrPht(TCNQ)_2$ salts; highly-conductive form of PrPht–TCNQ by crystallization in polymer matrix, 107

Raman scattering
of doped polyacetylene, 35
Raman spectra
of polypyrrole and its 2,5-$^{13}$C-substituted and C-deuterated analogues in doped and undoped states, 329

Segmented polyacetylene
$(CHD_y)_x$; electrochemical n-doping studies, 283
Spectral properties
of new series of organometallic TCNQ salts with metallocene stacks, 145
Spectroscopic studies
of $(CH)_x$ from PVC, synthesis and, 7
Spin resonance
in n-doped polyacetylene, transport and, 23
Structural properties
of alkali-metal-doped polyacetylene; some e.s.r. studies, 31
Surface plasmon study
of electrochemically prepared polymers; polyazulene, 245
Syntheses
of conducting salts $(BEDT–TTF)_2X$ ($X = CF_3SO_3$ or $p$-$CH_3C_6H_4SO_3$), 117
Synthesis
of $(CH)_x$ from PVC, and spectroscopic studies, 7
of oriented polyacetylene films, and characterization, 1

TCNQ salts
electric and magnetic properties of organometallic, 137
origin of anomaly in d.c. conductivity in $(BEDT–TTF)_xTCNQ_y$ salt, 157
properties of conductive polycarbonate films reticulate doped with $MPht(TCNQ)_2$ and $PrPht(TCNQ)_2$ salts; highly-conductive form of PrPht–TCNQ by crystallization in polymer matrix, 107
spectral properties of new series of organometallic, with metallocene stacks, 145
Temperature dependence
of a.c. conductivity in polymer/organic metal systems, 89
Thiophene
electropolymerization of, study of, 203
$(TMTTF)_2X$ salts
4 K crystallographic and electronic structures of, ($X^-$: $PF_6^-$, $AsF_6^-$), 343
Transport
and spin resonance in n-doped polyacetylene, 23
Triiodide chain disorder
in some iodide organic salts, X-ray study of, 127
TTF salts
e.s.r. and electrical properties of organic metal $(BEDT–TTF)_4Hg_3Cl_8$, 161
optical study on bis(propylenedithio)-tetrathiafulvalenium (BPDT–TTF) salts, 301
origin of anomaly in d.c. conductivity in $(BEDT–TTF)_xTCNQ_y$ salt, 157
syntheses, crystal structures and physical properties of conducting salts $(BEDT–TTF)_2X$ ($X = CF_3SO_3$ or $p$-$CH_3C_6H_4SO_3$), 117
Vapour phase doping
of polyparaphenylene with K, 47
Vibrational modes
displacement vectors of localized, around a charged soliton in *trans*-polyacetylene, 357
X-ray study
of triiodide chain disorder in some iodide organic salts, 127
Ziegler–Natta catalysts
polymerization of acetylene using various kinds of, 239
